Summary

Information Technology undergraduate at K. J. Somaiya Institute of Technology with a **9.05 CGPA** and hands-on experience building and deploying full-stack applications using **Node.js, Express.js, React.js, and MongoDB**. Experienced in developing RESTful APIs, implementing authentication and authorization, and integrating external APIs, with a strong foundation in **Java, Data Structures and Algorithms, and Object-Oriented Programming**. Seeking SDE and Backend Development internships to apply problem-solving skills, strengthen backend engineering expertise, and build reliable, scalable software solutions.

Technical Skills

Programming Languages – Java, JavaScript, SQL

Frameworks & Libraries - React.js, Node.js, Express.js, Bootstrap, Tailwind CSS

Databases - MySQL, MongoDB

Tools & Technologies - Git, GitHub, Postman, Docker, REST APIs, WebSockets(Socket.IO), HTML5, CSS3

Experience

Data Analyst Intern, Bluestock Fintech (Remote)

8 th Oct'26 – Present | GitHub

- Processed and validated 64,320 NAV records and 32,778 investor transactions across 40 schemes, 10 fund houses, and 5,000 investors; verified 40/40 scheme code matches and zero duplicate NAV records, and organized the datasets into a SQLite database with fact and dimension tables.
- Computed CAGR, Sharpe, Sortino, max drawdown, Nifty 50/100 alpha and beta, and 95% VaR/CVaR for 40 funds from NAV history, and built a 4-tab dashboard with category and fund-house filters.

Projects

Real-time Stock & Mutual Fund Analytics Platform

Live | GitHub

Tech - JavaScript | Express.js | Node.js | React | Bootstrap | MongoDB

- Developed a full-stack stock and mutual fund analytics platform deployed on Render, with a backend of 8 Express services behind a central API gateway also integrated Upstox REST APIs and a live market feed to stream real-time prices to clients with Redis caching.
- Secured APIs with JWT authentication, role-based authorization, request validation and rate limiting; implemented idempotent simulated order execution using MongoDB transactions and a weekday 23:15 IST mutual fund NAV sync with missed-run recovery, backed by 49 passing automated tests.

Wanderlust - Travel Listing Web Application

Live | GitHub

Tech Stack - JavaScript | Express.js | Node.js | Bootstrap | MongoDB | EJS

- Built a full-stack travel listing platform deployed on Render, with listing CRUD, Cloudinary image uploads, user reviews, and Joi server-side validation.
- Implemented local and Google OAuth 2.0 authentication with owner-only edit and delete authorization; integrated MapTiler geocoding to store GeoJSON coordinates and render listings on interactive maps, with search and filtering across 10 categories.

Education

K. J. Somaiya Institute of Technology | B.Tech | Information Technology — CGPA – 9.05(SEM 4) | 2024 – Present

D. G. Ruparel College of Arts, Science and Commerce | XII | PCMB — 85.86% | 2022 – 2024

Certifications

GitHub Foundations - GitHub | Link | June 2026

IBM Web Development Fundamentals - IBM (Coursera) | Link | May 2026

Goldman Sachs Operations Job Simulation - Forage | Link | January 2026

Data Structures and Algorithms (DSA) Certificate - Apna College | Link | September 2025.
